

Fiber Closeout Package Checklist

Every item an ISP or prime expects before it accepts the invoice. Run each closeout against it before the crew leaves the job.

TELECOM CONTRACTOR SOLUTIONS
TELECOMCONTRACTORSOLUTIONS.COM

Work order / ticket #	ISP / prime	Crew lead
Job address / segment	Date work finished	Package submitted (date)

1. JOB IDENTITY

- ☐ Work order, ticket, or PO number exactly as the ISP issued it
- ☐ Job address, segment or route IDs, ISP project name
- ☐ Authorized scope attached: codes and quantities from the RFP or work order

2. PROOF OF WORK

- ☐ As-built marked with what was placed, codes and quantities on it, revisions dated
- ☐ Footage and unit counts per code (LF, EA) that total to the as-built
- ☐ Photos before, during, after: pit or trench before backfill
- ☐ Photos: splice case open and closed
- ☐ Photos: pedestal or handhole, restoration complete
- ☐ Time and GPS stamps where the ISP asks for them
- ☐ Test results where the spec requires: OTDR traces, light levels, both directions if specified

3. COMPLIANCE

- ☐ 811 locate ticket numbers for any underground work
- ☐ Locate mark photos before the dig
- ☐ Permits and traffic control records where the route needed them
- ☐ Safety or tailboard record if the ISP requires it with the package

4. VARIANCES

- ☐ Over or under quantities against the authorized scope, with the reason
- ☐ Change orders approved and dated
- ☐ Damage, utility hits, or restoration notes with photos and who was notified

5. SIGN-OFF

- ☐ Crew lead completion with the date the work actually finished
- ☐ ISP, prime, or customer acceptance where the contract calls for it

6. THE INVOICE

- ☐ One line per code, quantities matching the as-built totals
- ☐ Rates matching the contract
- ☐ One invoice per work order or ticket if that is how the ISP pays
- ☐ Package attached or referenced the way the portal expects

THE TEST THAT MATTERS: can someone who was not on the job tie every invoice line to a code, a quantity, and a photo without asking the crew a question? If not, the ISP will ask, and the invoice waits.
